

## Job Outlook

Employment of **Jobsite Safety Technicians** is expected to grow about as fast as the average for all occupations through 2012, reflecting a balance of continuing public demand for a safe and healthy work environment against the desire for smaller government and fewer regulations. Additional job openings will arise from the need to replace those who transfer to other occupations, retire or leave the labor force for other reasons. In private industry, employment growth will reflect continuing self-enforcement of government and company regulations and policies.

Employment of **Jobsite Safety Technicians** is affected less by general economic fluctuations than employment in other occupations. Federal, State, and local governments, which employ about 2 out of 5 of all specialist and technicians, provide considerable job security.

Employment of **Jobsite Safety Technicians** is affected less by general economic fluctuations than employment in other occupations. Federal, State, and local governments, which employ about 2 out of 5 of all specialist and technicians, provide considerable job security.

Jobsite Safety Technician Academy

## JOBSITE SAFETY TECHNICIAN ACADEMY

Offered by Industrial Safety Training Council

## The Jobsite Safety Technician Academy

The Jobsite Safety Technician Academy provides an occupational health and safety competencies based curriculum which prepares candidates to take on the role of Jobsite Safety Technician. The Jobsite Safety Technician Academy identified competencies for the implementation of effective occupational health and safety management in both Construction and General Industry. There are many competencies, required for the successful candidate to master before taking on the safety responsibility on the jobsite or in the workplace.

The Jobsite Safety Technician Academy competency based approach addresses both the knowledge and skills required to actively and successfully implement, maintain, and innovate any companies' occupational health and safety process. The successful graduate of the Academy will increase their contribution to the companies they work for or become an immediate asset to a new employer.

### Successful Course Completion Includes:

OSHA 30 Hour – General Industry  
OSHA 30 Hour - Construction Industry

Competent Person Training for:

- Confined Space
- Excavation and Trenching
- Fall Protection
- Scaffolds

## Nature of the Work

Many **Jobsite Safety Technicians** examine and test machinery and equipment such as lifting devices, machine guards, or scaffolding, to ensure the machinery and equipment meet appropriate safety regulations. They may check that personal protective equipment, such as masks, respirators, protective eyewear, or hardhats, is being used in workplaces according to regulations. They also check that dangerous materials are stored correctly. They test and identify work areas for potential accident and health hazards, such as toxic fumes and explosive gas-air mixtures, and may implement appropriate control measures such as adjustments to ventilation systems. Their investigations might involve talking with workers and observing their work, as well as inspecting elements in their work environment, such as lighting, tools, and equipment.

## Responsibilities

**Jobsite Safety Technicians** collect data on work environments for analysis by occupational health and safety specialists. Usually working under supervision of specialists, they help implement and evaluate programs designed to limit risks to workers. The specific responsibilities of occupational health and safety specialists and technicians vary by industry, workplace and types of hazards affecting employees. In most settings, they initially focus on identifying hazardous conditions and practices. Sometimes they develop methods to predict hazards from experience, historical data, and other information sources. Then they identify potential hazards in systems, equipment, products, facilities, or processes planned for use in the future. After reviewing the causes or effects of hazards they evaluate the probability and severity of accidents that may result.

## Working Conditions

**Jobsite Safety Technicians** work with many different people in a variety of environments. Their jobs often involve considerable field work, and some travel frequently. Many **Jobsite Safety Technicians** work long and often irregular hours.

## Employment Opportunity

Employers may be fined for violation of OSHA standards. Most companies either employ their own occupational health and safety personnel or contract with occupational health and safety professionals to ensure OSHA compliance. **Jobsite Safety Technicians** provide companies with an avenue to evaluate the health and safety of their employees without the risk of being fined.
